

# Assumptions

## USUAL ASSUMPTIONS:

- I know all I need to know
- If they don't agree with me, it's their problem
- It's all my fault (or: It's all their fault)

## SAFER ASSUMPTIONS:

- I don't know everything; it's in my own interest to learn more
- The problem is neither mine nor theirs, it's ours!
- We have probably both contributed to the current situation

# Assumptions

## USUAL ASSUMPTIONS:

- I see things as they are

## SAFER ASSUMPTIONS:

- We are all biased and we:
  - see different data
  - interpret them differently
  - reach different conclusions
